About Heritage

The Stage Today

In 1973, Heritage Bag Company was created to be a supplier of plastic trash bags while also helping to develop greater market awareness for their product. Since its inception, Heritage has grown to become one of the largest industrial/institutional can liner manufacturers in the industry today. With multiple facilities strategically located across the United States, Heritage manufacturers products in response to market demands. From linear low density and high density trash bags, to low density food and utility bags, we offer a full-range product line to meet all customers' requirements.

A Unique Company

Heritage is a unique company. As a second-generation, privately owned business we maintain a stable presence in an ever changing business environment. Our growth is driven by a commitment to superior product quality, excellent service, and support of distribution partners. Dependability is the defining characteristic of our organization. Heritage is proud of it's people-to-people, long-term business relationships. With a focus solely on the institutional can liner markets, our large, national sales force works hard to know and serve each of our customer's unique requirements. Heritage takes time for personal customer care because we believe that true customer satisfaction is distinguished by long-term relationships

Total Commitment

We recognize and respect the fact that our employees are our greatest asset. After three decades of business, it is significant that 30% of our employees have been with Heritage for more than 10 years. Company stability is a core strength and point of assurance for our customers. Heritage "Commitment" also includes a critical concern for product quality and continued development of industry standards.

Heritage Laboratory

Heritage has the finest Laboratory in the industry.

Rely on Heritage
