

GHS *Are Your Customers Compliant or at RISK for FINES?* **Impact**

The Globally Harmonized System (GHS) of classifying and labeling chemicals is an internationally agreed-upon system, designed to replace various global classification and labeling standards. Employers should conduct employee training and make the designated changes throughout their facilities. Impact has the products your customers need to comply with the new laws and avoid millions of dollars in fines levied every year by OSHA.

As of Dec. 1, 2013 OSHA did begin leveling fines. Fines run up to \$7,000 for a single infraction. Repeat infractions can cost as much as \$70,000.
