

# Keep it lean, mean and clean with WAXIE-Green™

High-quality **WAXIE-Green™ Hand Soaps** incorporate the latest technology in order to deliver superior results, and include products that have been certified by third-party ecolabels. WAXIE-Green™ Hand Soaps offer a compelling combination of performance, price, health and safety, along with an environmentally preferable profile.

In addition, these products perfectly complement WAXIE's GPS® Green Partner Support™ program, which promotes workplace wellness and reduced environmental impact. WAXIE GPS® is continually seeking improvements, and considers the definition of “environmentally preferable” to be “products and services that have a lesser or reduced effect on human health and the environment when compared with competing products and services that serve the same purpose.”

All soaps shown are **ECOLOGO CCD-104/ UL 2784 Certified**. UL ECOLOGO is classified as an ISO (International Standards Organization) Type I ecolabel assessed by the Global Ecolabeling Network, and it is one of the most recognized ecolabels in North America. Since 1988 UL ECOLOGO has helped purchasers and consumers identify products and services that meet multi-attribute, lifecycle-based sustainability standards, and which have met strict criteria for reduced impacts on human health and the environment based upon third-party audit and review.
