SANITARY SUPPLY

**SIMPLE, EFFECTIVE HAND HYGIENE FOR A  
HEALTHY WORKPLACE & ENVIRONMENT**

**Illness outbreaks can severely impact employee health and your business...**

## **ARE YOU PREPARED?**

**1 out of 4 people** who use the restroom **DO NOT WASH** their hands.<sup>1</sup>

**M**ost germs are spread by hands; hands carry germs throughout the office. With one touch, germs may spread to co-workers and common work surfaces.

### **The average desk harbors over 10 million germs.<sup>2</sup>**

Germs are often found where employees spend most of their time – the desktop. Busy people don't have time to wash their hands frequently, so the result may be the spread of germs that may cause illness, absenteeism and loss of productivity. The CDC and the U.S. Department of Health and Human Services recommend the use of instant hand sanitizers when you can't get to soap and water.

## **AND DID YOU KNOW?..**

**Bulk soap dispensers are open to the environment.**

Germs grow inside because it isn't practical for maintenance personnel to properly clean and sanitize them each time they are refilled. New soap becomes tainted as it is added to contaminated soap.

1 Sept. 2007, Observational study sponsored by the American Society of Microbiology and the Soap and Detergent Association (SDA)  
2 C.P. Gerba. *Germs in the Workplace*. Unpublished observational study, University of Arizona.

# BE PREPARED.

Practicing good hand hygiene is your best defense against illness-causing germs.

A healthy building starts with **WAXIE®** solutions for environmentally responsible hand hygiene in the workplace.

1.

## HAND WASHING

Today's office buildings have a variety of hand hygiene challenges from general handwashing in the restroom to removing heavy duty soils in physical plant areas.

### WHY FACTORY-SEALED REFILLS?

The soap inside is protected from contamination because it is factory sealed and includes a fresh nozzle with each refill. WAXIE® soaps, including our green certified foam soaps, are the logical choice for proper hand hygiene.

1 This product meets the Green Seal™ environmental standard for institutional hand cleaners based on its reduced human and aquatic toxicity and reduced smog production potential.

2.

## HAND SANITIZING

### WHEN SOAP & WATER ARE NOT AVAILABLE.

Germs are often found where employees spend most of their time – the desktop. Busy people don't have time to wash their hands frequently, so the result may be the spread of germs that may cause illness, absenteeism and lost productivity. The CDC and the U.S. Department of Health and Human Services recommend the use of instant hand sanitizers when you can't get to soap and water.

Instant Hand Antiseptic CCD-170

2 Meets EcoLogo™ hand sanitizer standard for environmental leadership and proven performance.

**PURELL® is America's #1 instant hand sanitizer.**

PURELL kills 99.99% of most common germs that may make you sick. It's the brand people know and trust.
