Science made simple.

VOC exempt

Vectair V-Air® SOLID is completely free of any solvents, propellants, HFCs and harmful volatile organic compounds (VOCs).

No batteries required

All it needs to work is natural airflow. The refill is 100% organic and biodegradable and the dispenser is 100% recyclable.

Sub-micron technology

Vectair V-Air® SOLID particles enable superior fragrance delivery, yet are sized typically below 1.0 micron. This means they are much smaller and lighter than the particles in other fragrance systems, remaining airborne for many hours.

Multi-phasing

The Vectair V-Air® SOLID ceramic capsule is infused with high quality perfumes, then complemented by an integrated internal fragrance core. These combine and diffuse powerful key fragrance notes that are subtly different.

Just three parts

The technology behind Vectair V-Air® SOLID is packed into one powerful refill component, so we've done the hard work for you – no fuss, just fragrance. A fully recyclable retaining clip attaches the refill to the dispenser.

No liquids

Vectair V-Air® SOLID contains no liquids so won't spill, even if it is knocked over.
