

HEALTHY SKIN & PRODUCTIVITY GO HAND-IN-HAND

Most wellness programs focus on disease management and long-term health. If yours doesn't include skin health, you might be missing an opportunity for more immediate results.

We make it easy to integrate hand hygiene into your wellness program. This simple program helps stop the spread of germs that may cause illness and helps prevent dry and cracked skin. The goal is to keep workers healthy and productive, and keep costs down.

Make our array of soaps, wet wipes, moisturizers and hand sanitizers available to all employees.

With a wide range of products and formats available, you can provide the opportunity for good hand hygiene to your employees in every situation:

- Portable solutions for employees on-the-go
- In common or high traffic areas of your facility
- At wash sinks throughout your facility
- At desks and work stations
- In restrooms
- In eating areas
- Time clock areas for use at the beginning and end of a shift

The Occupational Safety and Health Administration (OSHA) requires employers to make handwashing facilities or antiseptics available to employees¹ in contact with potential blood borne pathogens. Major world health organizations recommend hand hygiene strategies that include handwashing and alcohol-based hand sanitizer.

When provision of handwashing facilities is not feasible, the employer shall provide either an appropriate antiseptic hand cleanser in conjunction with clean cloth/paper towels or antiseptic towelettes. When antiseptic hand cleansers or towelettes are used, hands shall be washed with soap and running water as soon as feasible. 1910.1030(d)(2)(iv)
