

Pure Performance Floor Care Products

PURE REFLECTION FLOOR FINISH

Pure Reflection Floor Finish is part of the Pure Performance Floor Care Program. Pure Reflection is an extreme performance floor coating that combines deep gloss, high durability and ease-of-use into one product. Its high molecular weight, T3-polymer, and compressed nano-zinc inter-linking produce a beautiful, long lasting shine that resists black marking and scuffing. Pure Reflection Floor Finish is ideal for limited maintenance settings such as classrooms, patient rooms, and offices. Pure Reflection responds extremely well to regular burnishing with equipment ranging from 1500 rpm to propane burnishers, making it ideal for retail establishments, hallways and other frequently maintained areas.

Packaging: 2x2½ Gal. Containers

Product coverage rate: Up to 3,000 sq. ft. per gallon

ITEM #930235

Pure Performance Floor Care Products

PURE REFLECTION FLOOR FINISH

Features	Advantages	Benefits
High Durability	Offers a long lasting shine as a result of superb scuff and black mark resistance.	Less maintenance required.
Ultra High Gloss	Pure Reflection has outstanding initial lay down gloss and is the perfect product for both high speed burnish and no-burnish floor care systems.	With a high off-the-mop shine, where time and equipment may not be available to burnish the floor, Pure Reflection provides an excellent option where our product can work well with a UHS burnish program or without.
Incorporates Patented Nano-Zinc Technology	Produces a more tightly cross-linked film.	Increases durability and improves lay-down gloss.
Ultra-Clear Resin Technology	The polymers used in this finish do not fog or haze like many of the other products available. Being clear allows for extended service life, due to the finish maintaining a clean and clear look.	Reduced stripping, along with scrub and recoat cycles, which reduces the overall maintenance cost with this product.
High Solids = High Performance Throughout	This HIGH SOLIDS floor finish is designed to build to the thickness desired quickly, to provide extended service life, even under the most severe traffic conditions.	Works well in both regular maintenance conditions, as well as reduced maintenance conditions. Being durable means that it can stand up under tough traffic conditions and minimal maintenance.
Black Heel Mark Resistance (BHMR)	Very good black heel mark resistant (BHMR). Excellent scuff resistance.	Greater trouble-free life, with minimal cost associated with maintenance.
Repairable	The finish is engineered to be easily buffed with the full selection of floor maintenance equipment (Electric, Battery, Propane) without any degradation to the finish or its service life.	Fits well into any maintenance operation and performs well in all environmental conditions.
Fast Drying	Dry times under 30 minutes, allows for faster application of multiple coats to complete job.	Faster dry times means less downtime between coats.
Low VOC Formula	Pure Reflection meets California's 2011 1% VOC Standard.	Reduces emissions – environmentally responsible.
