

March 23, 2020

Dear Customers,

Formula Corp manufactures soaps, detergents and disinfectants. Manufacturing of these products is part of the DHS Chemical Sector SSA and Formula Corp. is an Essential Critical Infrastructure Workforce company. We will continue manufacturing during this time, to ensure the continued supply of vital products during the Covid-19 pandemic.

These essential activities have been outlined in a March 19, 2020 memo from DHS. <https://www.cisa.gov/sites/default/files/publications/CISA-Guidance-on-Essential-Critical-Infrastructure-Workers-1-20-508c.pdf>

Formula Corp is prioritizing our activities that support the Essential Critical Infrastructure, as outlined in the memo. The priorities for Formula Corp are:

Hand Cleaning, laundry chemicals, sanitizing, disinfecting or sterilization supplies, and tissue and paper towel products, especially in support of Healthcare / Public Health operational needs.

Sanitation of food manufacturing processes and operations from wholesale to retail

Chemicals, and other substances used by the food and agriculture industry, including pesticides, herbicides, fertilizers, minerals, enrichments, and other agricultural production aids

We have added an additional 40 hours of production time per week and hope to add more. Delivery of products that are not in support of the Essential Critical Infrastructure may be delayed. We apologize for this inconvenience and ask for your patience and understanding.

Sincerely,

Chas Werner
President
